

SILENT NIGHT - Solo Christmas Project

“Sometimes, life takes unexpected turns, & we often find ourselves in painful situations that we never could have prepared ourselves for. We all have different "curve balls" & some may have more than others...however, I truly believe that with the right attitude, the very thing that was supposed to destroy you can become the very thing that makes you. For me, it was the multiple aneurysms I've had that forced me stop & focus on what's truly important in life...For my dear brother Justin Kauflin, it was losing his sight that forced him to stop, rely on his relationship with God, & pursue a life creating music that would inspire others. I'm SO proud of Justin for creating this absolutely stunning Christmas album as a representation of his journey to find peace in any situation he encounters...I also always love to see our artists collaborating with each other, so it makes my soul smile to hear Jacob Collier featured on the title track, "Silent Night"...Well, anyways, I hope that during this holiday season (especially when things may not always be 100%), you can try to find purpose in your pain & use it as fuel to encourage those around you...So, thank you Justin for gifting us with your music & encouraging us to Keep On Keepin' On! - QUINCY JONES
